

incandescent - festoon with pointy ends light bulb lamp **6844**
PHILIPS

C5W-5W-6V-SV8.5 DONSBULBS
FESTOON/6V/5W/37MM/11MM

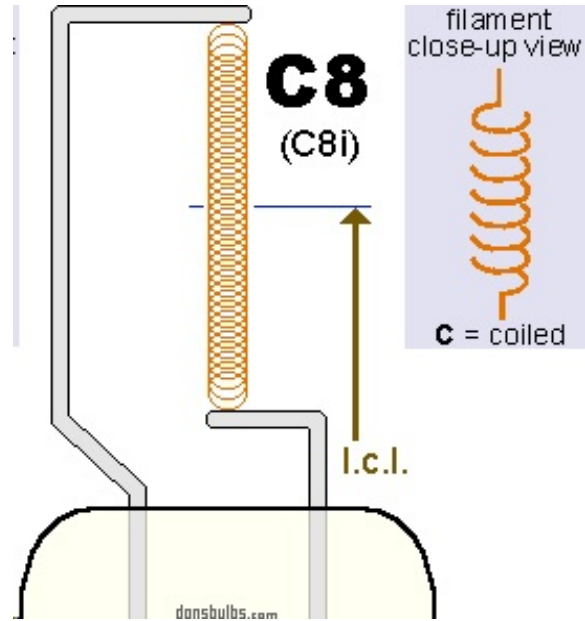

bulb specifications:

category: Incandescent -
FESTOON with pointy ends

volt: 6
amp: 0.833
watt: 5
base: SV8.5-8 - Festoon
glass: T3-1/4
filament: C8
fil.res.: 7.2 ohm
m.o.l.: 1.46 inch (37MM)
d.hours: 300
notes: clear glass
dim: 37MMx11MM
incandescent lamp
style: FESTOON

typical shape of T3-1/4 glass envelopes (not to scale)

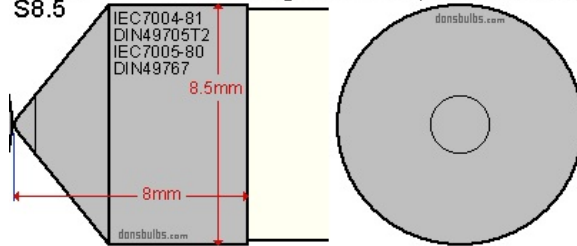

typical shape of C8 filament (not to scale)

SV8.5-8

S8.5d (standardpro) festoon
 LES (British lilliput edison cap)
 single contact (double ended)

SV8.5
 S8.5

EXAMPLE
for finding your correct festoon bulb

You must already know the bulb's volt and watt.
 Then measure your old bulb size in millimeters

Round up all measurements to nearest ODD whole millimeters.
 ... for example if length measured 42MM then round up to 43MM.
 ... for example if width measured 8.5MM then round up to 9MM.

Most festoons are voltage rated 6V, 12V, 24V, 28V, 30V, 48V, 60V.
 ... so look for closest voltage / wattage range if exact isn't listed.

If bulb volt is 12.8V and watt is 5.1W then you need bulb:

FESTOON / 12V / 5W / 43MM / 9MM
volt watt length width

All my FESTOON bulbs have "pointy ends."

If your old bulb looks like this:

... then you need a FUSELAMP type, not FESTOON.

If your old bulb looks like this:

... then you need a RIGID-LOOP type, not FESTOON.

industry standards for base:
 SV8.5-8 - Festoon (not to scale)
